HOW MUCH "above par" are the dollars in your packet?

IT WILL depend on how closely you study the buying opportunities outlined in the store advertisements.

MISS M. CAMPBELL

THE real line of demarcation between Semi-ready Clothes and average clothes is the value.

After all, and laying aside all other questions, it's the value which counts most.

For good value must combine with it correct styl-skilful tailoring, all-wool fabrics and perfect fitting. Otherwise the clothes are not valued by the wearer, no matter how little they cost.

Semi-ready Clothes, \$15 to \$40—the same prices every where in Canada—that we also guarantee. F. W. Millard, Belleville, Ont.

Mr. Cook added: "My reason for referring this back to you is or ownt of the situation of the land and the fact that a bridge is now uilding across the river, which will make this land valuable in the Very r future, and as a consequence I would like to be perfectly clear to what action you desire taken."

Excellent School Suits

Every school boy must be out-fitted about now for the spring term !

Boys—the right kind of boys—boys with plenty of life in them—need suits of cast iron to withstand the service given them.

Here is where we have a word

Boys' Clothing to wear must be well made, of good materials, but all the superb fabrics in the world won't give service if the places where stroin comes are not reinforced and properly

Because our Boys Clothing is so made we say it is.

"Best By Test"

If you've tried our kind you know; but if not, for whatever your boy needs, come in.

We've Suits, Caps, Shirts, Blouses and extra Trousers, or anything and everything the school boy wears. Our prices are always reasonable.

YOUR DOLLARS vary in value according as they vary in purchasing power-

THE MAN or woman who studies adver-ising is able, frequently, to make one dollar do the usual work of two.

THE EXPERIENCED reader of advertisements will always make a dollar com-mand a premium, that is, make it buy more than the dollar of a non-render of advertise.

HOW MUCH "above par" are the dollars in your packet?

IT WILL depend on how closely you study the buying opportunities outlined in the store advertisements.

An Innovation in Underwear

The foundation for correct attire is a vest that his like a glove. Such is the Cumiy-Cut Vest, which aids materially in presenting the long graceful effects demanded by dame fashion.

Made of luxuriously soft yarn (spun and prepared by us), Cumfy-Cut Vests are unique in that they are so fashioned that there is no possibility of the straps elipping from the shoulder. This feature will make instant appeal to particular dressers who are already familiar with the superior quality of Hygeian and Peerless underwear, under which brands Cumiy-Cut Vesta are offered.

Cumfy-Cut Vests and Union Suits are made in all sizes for ladies. Three grades—Cotton, Liste, Mercerized and Silk. AT ALL FIRST CLASS DEALERS EVERYWHERE IN CANADA

RATES OF ADVERTISING

POSTMASTER-GENERAL PELLETIER BRINGS DOWN CABLE RATES

The work which has already been done by the Hon, L. P. Pelleties Postmaster-General in providing a better steamship mail service beanada and the mother country is being rivalled by the announce just made by him of the result of work done by him last summ while in England, which will bring about better conditions for Canada respect of ocean telegraphic communication. It will tend to bring more closely together Canada and the mother country and thereby co ment the bonds of Empire; but the scheme will also provide better on ditions for telegraphic communication between Canada, the United m and other parts of the British Empire, more especially Australia and New Zealand.

The bill presented by Mr. Pelletier provides a remedy for the me poly, which has hitherto existed on the part of American companies in the cable service between England and Canada. It is unfortunately true that the American cable companies have in the past been the cen-tral agencies for spreading cable news between the mother country and But Mr. Pelletier by his new arrangement has changed the

The Postmaster-General has been able to formulate his plan be cause a number of very wealthy persons in the mother country have formed themselves into a syndicate, incorporated as the Universal Radiotelegrab Syndicate, Limited. They will bring to Canada the most effective and promising system of wireless telegraphy known as Poulsen's Are System. It was tried and gave good results. The syndicate undertake and guarantee, first, to establish wireless communications. tion between Canada and the mother country. The central point to which they shall come in Canada is Montreal. Then, in the second place, the syndicate guarantee that they will give an excellent service at a speed of four hundred letters per minute. This is very important. Four hundred letters per minute means one hundred per cent, better on the average than the cable companies can do at the present time.

For code messages, eight pence a word instead of twelve pence which is the charge made by the cable companies. In the second place and this is probably the most important part of the arrangement in se far as the general public are concerned, plain language cablegrams ransmitted at the rate of four pence a word, without any defer-hich is better by two-thirds than the cable companies are doing anow. Government inessages, or cublegrams, will be transmitted for two and a half@effee per word and press nessages will be transmitted for for two penes a word. The cuble companies have in the past rogen-trated their efforts on making a bigger reduction in the press rates. Shan in the rates changed to the general public.

There will be no discrimination in rates between the East and West of Canada and there is a clause in the contract by virtue of which the land life company cannot charge more than the rates which have already been mentioned. The rights of the public as far as extra charges are concerned will be fully protected, as they cannot be raised without first getting the consent of the Beyord of Railway Commission-sers. The Government does not give the company a subsidy either. The only thing given is a landing license.

The whole business, and this is the chief feature of the schene, consists in the fact that it will be under the jurisdiction of the Beard of Railway Commissioners. The syndicate are prohibited from making any traffic arrangements or combine with any other wireless or cable land line company without the authorization of the Railway Board. This protects the general public absolutely.

The first two stations are to be: one in the United Kingdom, probably on the coast of Ireland, and the other at n point to be approved by the Governo-in-Council on the shores of Canada in New Brunswick or Nova Scotia. They will build and operate their stations at Alderman John Coughlin, "Bith-house John," shocked by the prevail-ing mode, sugglit to have detailed by the prevailed of the prevailed of the second of the cill an ordinance making it littgated for scoren to wear tight-fitting skyris." The balance will be re-paid to them when they give the complete satisfaction which they have guaranteed to give.

The whole system is to be completed within twelve months after the signing of the contract, and after the Governor in Council has given them a license to establish their station in Canada.

"I Never See You Dusting" said Mrs. White

"WELL, Mrs. White, I'll confess that I don't have to do much dustion I don't have to do much dusting since we got our McClary's Sun-shine Furnace."

"You don't say so, Mrs. Wright. What difference does that make? Isn't one fur-nace the same as another?" "Well, I'll tell you, Mrs. White— McClary's Sunshine is certainly different from our last furnace. It's a clean furnace. It has what McClary's call a sure-acting dust flue."

"A dust flue, ch?

"Yes, and when George, my husband, 'rocks' down the ashes—he doesn't have to break his back shaking the Sunshine, you know—the dust all goes up the sure-acting dust flue. It doesn't come up into the house."

"Wish our furnace was a Sunshine, Mrs. Wright. And you should just see Mr. White after shaking our furnace. Mad! Well, I should say so. And he sure looks his name. He is WHITE. His suits are ruined, he declares, as soon as he gets then, and he swears that the thing is not a furnace at all, but a patent coal-consumer gotten out to benefit the coal man."

"But why not get your husband to put in a Sunshine furnace, Mrs. White? You can persuade him to do most anything for you. And it will cut down your coal bills. We burn a third less coal with the Sun-shine."

Do Yourself Justice! Before You Buy a Rug, See First, Our Large Range

THE modern, well furnished home is incomplete without a suitable RUG to match your furnishings. When a visitor enters the home the first impression created is chiefly centered on the rug. It is the one particular surrounding of the home that greets the eye if well covered. If there is a beautiful rug on the floor it immediately meets with pleasing aconitation, if worn, faded or bare presents a cold, uninviting appearance. See the.e:
